Track the Season's Conditions

Check your local advisory (or that of the area where you will be taking your course) daily for about a week ahead of your course. Fill out the following table with information from the advisory.

Date	What is the highest danger rating today (at any elevation band)?	Was there a watch, warning or special advisory statement? (Y/N)	What is the primary problem type?	Is there a persistent problem type (even if not primary problem)?	Were there avalanches reported today? If so what size (small, large, very large or D1-5)	Is there a primary layer of concern?
YYYYMMDD	Considerable	N	Storm	Y	Y - large	02/14 surface hoar
